Centre for NanoScience and NanoTechnology (CNT) was established in 2008 to address the various issues of science and technology considering the interdisciplinary nature of emerging field cutting across Science, Engineering and Technology. We have diversified our research interest from Nanomaterials to biological applications including the nanowire based Field Emission Transistor (FET) biosensor and stabilizing liposome using nano particles and organic light emitting diodes. Interfacing nano and bio system would create new and powerful tools that enable direct, sensitive and rapid analyses of bio and chemical molecules and also screening of new drug molecules.

The mission of the Centre is to promote, develop and bind interdisciplinary research activities in Bharathidasan University.

We have generated a revenue of Rs. 58,735/- by extending "Nano User Facility (NUF)" to external and internal academic community.

20. NATIONAL FACILITY FOR MARINE CYANOBACTERIA AND BIO INFORMATIC CENTRE

Director / Coordinator: Dr. D. Prabaharan, Department of Marine Biotechnology

Cyanobacteria, oxygenic photosynthetic primordial organisms, have existed since the protezoic era (3.5 billion years ago). Marine cyanobacteria and microalgae are a boon, as they require seawater, reduce carbon and water footprints, and do not compete with the land. The Indian subcontinent, with its vast coastal line @7516Km is one of the marine 'hotspots', including the mainland and Andaman Nicobar and Laccadive Islands. Cyanobacteria bridge the gap between bacteria and plants possessing both potentials. This uniqueness has kindled the interest of the Department of Biotechnology, Ministry of Science and Technology, Govt. of India, which has embarked upon the establishment of the National Facility for Marine Cyanobacteria at Bharathidasan University, Tiruchirappalli, and the "brainchild" of Dr. G. Subramanian in the year 1991. Since 2015 the facility has been accredited and upgraded to National Repository for Marine Microalgae and Cyanobacteria by the Department of Biotechnology, Govt. of India. The National Repository houses @1000 marine Cyanobacteria and Microalgae, representing mesophilic, thermophilic, psychrophilic, and hypersaline forms, including the Hong Kong and Polar regions (Arctic and Antarctic) too. The facility is one of the seven centers in the World that holds polar strains in a repository housed at 4±2°; as a result, expeditions were voyaged by Dr.D.Prabaharan under the aegis NCAOR, Ministry of Earth Sciences, Govt. of India to both the poles.

The facility is a member of the World Federation for Culture Collections (WFCC) and is registered with the World Data Centre for Microorganisms (WDCM, registration number 976) and maintains a dedicated web site nfmc.bdu.ac.in.

The offshoot of National Facility for Marine Cyanobacteria a sub-center – Distributed Information Centre (Sub-DIC), Bioinformatics Centre sponsored by DBT, Govt of India has a dedicated website holding the catalog and passport data of the repository strains, publications bioinformatics tools developed by the center, and the services available. The facility has completed 12 major projects funded by DBT, DST, DAE, DOD, UGC GOI agencies with a total outlay of 1274.078 lakh rupees.

In the current year, the facility received a prestigious project from DBT, Govt of India on Mission India MI#5 – in collaboration with University of Sheffield UK, titled "Outdoor mass cultivation of marine microalgae for biodiesel feedstock with improved solar conversion efficiencies" with the fiscal support outlay of Rs.75.33 lakhs. The facility takes pride being part of Country's biodiesel project in exploring a renewable potential biodiesel feed stock candidate of marine cyanobacteria and microalgae. The repository has a mass cultivation facility of a 5KL fiber tank, and the on-site scale-up technology is available for marine cyanobacteria Phormidium valderianum BDU20041 demonstrating the use of calcium-rich liquid (ossein) effluent and flue gas as nutrients at Pioneer Jellice Industries Pvt. Ltd, SIPCOT, Cuddalore, Tamil Nadu. The SUB-DIC has been regularly conducting annual workshops since its inception in 2001. This year in the nationwide workshop, 31 participants were given hands-on training in cyanobacterial research and bioinformatics. This year, 68 repository strains were distributed to the needy researchers of 22 institutions belonging to 8 States, including Tamil Nadu, mainly for biofuel, bioactive compounds, and bioremediation.

University Science Instrumentation center (USIC) is a central facility and it houses sophisticated analytical instruments. Its main objective is to provide services to all researchers and students of science departments in the University and in the constituent colleges of Bharathidasan University. Facilities for carrying out spectral, thermal, chemical, molecular and microstructural analysis on a variety of materials are extended to all researchers.

The Number of UG/PG/ M.Phil/ Research Scholars from the University Department/ Affiliated colleges/ Industries/ individuals likely to use the facility for the next 5 years

An average of 200 users per instrument for a single year, across University Departments / Affiliated Colleges / Industries / Individuals likely to use the facility. On the whole we have 11 sophisticated and basic instruments in the University Science Instrumentation Centre (USIC). Tentatively around 1000 users per instrument for 5 years and we expect above 10,000 users are likely to utilize the facility in next 5 years.

9. CONTINUOUS AMBIENT AIR QUALITY MONITORING STATION

Director / Coordinator: Dr. K. Thamaraiselvi, Department of Environmental Biotechnology

Tamil Nadu Pollution Control Board (TNPCB) has established Continuous Ambient Air Quality Monitoring Stations (CAAQMS) in Tamil Nadu at 25 locations. Bharathidasan University is one of the unique CAAQMS station among the 25 stations and its costs is roughly around Rs.2.5 crores and the entire cost is borne by TNPCB. In this regard, MoU was signed on 04/03/ 2016 through the Department of Environmental Biotechnology, Bharathidasan University, between the Registrar of Bharathidasan University, Tiruchirappalli and the District Engineer of TNPCB, Tiruchirappalli for the minimum period of 5 years which will be renewed by another 5 years or more as per the PWD rates at the option of TNPCB. TNPCB purchased the instrument through the open tender and it has been installed in December, 2018 at Bharathidasan University and running on a trial basis since July 2019. The instrument is connected through telephone and internet connections so that all the 25 stations are connected to CAC, TNPCB Chennai, and IIT, Chennai for data analysis. Data from this monitoring station at Bharathidasan University can be used by the scientific and academic community for research and teaching purpose. The faculty in charge Dr. K. Thamaraiselvi, Department of Environmental Biotechnology, where the instrument has been installed, will carry out periodic inspections of CAAQM stations. The following parameters can be measured continuously, SO2, CO, O3, NH3, NO, NO2,BTX – Benzene, Toluene, Xylene, and Meteorological parameters – rainfall, solar radiation, wind direction, wind speed, temperature, humidity Besides the above parameters, PM10 and PM2.5 can be measured on per hour basis.
